Description

Software for managing the sale of doors/windows.

FP DEALER is a program linked with FP PRO. It is used to process estimates and orders, starting from predefined price lists. It is targeted towards door/window makers who can work out their own sales lists to define the price grid, technical constraints, standard features and possible variants. As well as internally, The orders are then converted into production-read FP PRO jobs, without any need for paper documents and without ever having to re-enter the information.

For the management of its sales network (showroom and agents), FP DEALER can be integrated with VIEW, the web commercial configurator designed to optimize the sales process. VIEW simplify the creation of the offer for the customer and automates the commercial order management. In addition, VIEW allows you to view, configure, and set the product within a virtual photorealistic viewer, involving emotionally the final customer.
