Fp Pro
Fp Suite

ALU PVC STEEL

Description

Software for the design and calculation of doors/windows

FP PRO is the main FP SUITE program since it includes the basic functions used by all door/window makers: door/window design, job definition and calculation, analytical estimate, generation of workshop work lists, heat transmission calculation, CE mark management. It comes in 5 versions and is suitable for companies of any size. It is easy to use and employs a user-friendly graphical interface displaying real profiles, multi-joints, sections, 3D styles. It can operate in a network where files are shared over an SQL database.

Technical Data

START

Designs rectangular doors/windows, calculates materials lists, performs analytical estimates, generates cutting lists, calculates the heat transmission, manages CE labeling.

LT

In addition to the features of START: designs doors/windows with intermediate angles, connects to cutting-off machines.

STANDARD

In addition to the features of LT: designs arched doors/windows, displays 3D styles, operates in a network, handles job batches, lists, connects to FP WORKSHOP, connects to CAD.

EXECUTIVE

In addition to the features of STANDARD: manufacturing processes management through EASYMAC, connection to the machining centres for aluminium.

ENTERPRISE

In addition to the features of EXECUTIVE: connection to

machining centres for PVC, welding machines/trimmer machines, automatic benches for equipment screwing, multi-machine operations management, trestles for workpieces and frames.
